

PV 101 – Basic Photovoltaics - IU

Participants in this workshop will learn the basics of photovoltaic systems. They will learn to define PV, understand how PV works, identify the four PV system types, describe and identify components, understand the best application and limitations of each system type, define the solar window, understand energy efficiency and load estimates, identify PV mounting types and understand the basics of site assessment tools.

Course Instructor:

Kurt Nelson

Course Location:

Indiana University
SPEA Building
PV 278
Bloomington

Date:

Friday, March 28, 2008
9 am to 5 pm

Course Cost: FREE**Course Materials/Prerequisites:****Materials Required:**

Note pad
Pencil
Lunch

Prerequisites:

None
